## Project Overview

For some time, the State of Connecticut (CT or the State) has been actively engaged in rebalancing their Medicaid long-term care (LTC) services from institutional nursing facility (NF) settings, toward more emphasis on home and community-based services (HCBS) settings. In support of the State's Rebalancing Plan, the State has contracted with Mercer Government Human Services Consulting (Mercer) to assist in the development of projections by town of the supply and demand of LTC services between 2010 and 2025. The goal of the State is to enhance the awareness of setting choice amongst LTC consumers and LTC service providers by providing them with the relevant information as they navigate through the myriad of options available to them. The analysis presented in this report is expected to be updated periodically as more current information becomes available.

Success in rebalancing LTC services is commonly measured by the proportion of HCBS users out of all recipients eligible for either NF services or HCBS, the higher the proportion, the more successful the State.

## Limitations

The projections in this report have been prepared for the Connecticut Department of Social Services (DSS). We understand that DSS will be making this report publicly available. To the extent that information in this report is made available to third parties, the entire report should be made available. Users of the data and projections in this report must, in order to avoid misinterpretation of the information, have a sufficient level of understanding and expertise in LTC services and health care modeling.

Town-level projections necessarily involve projections with low numbers of persons in certain projection age/gender cells. Any projection involving such low numbers is subject to significant statistical fluctuation. Towns with no nursing homes will generally have data showing no, or very few, persons residing in nursing homes; such persons who were previously residents of the town will have necessarily migrated to other towns. When such a person moves to a nursing facility, his or her address becomes the address of the nursing facility, thereby making that person a resident of the town with the nursing facility. The totality of such movements gives the impression of little to no apparent demand in towns with few or no nursing facilities.

The information presented in this report includes projections of future contingent events. All possible contingencies are not considered. For example, changes to Medicaid eligibility due to legislation or economic circumstance could have a significant effect on the number of persons who use NF or HCBS. Also, changes in types of medical services available could alter the

portion of recipients who would be eligible for NF or HCBS. Improvements in mortality beyond that anticipated in the census projections could lead to different proportions of recipients of advanced ages.

*All estimates are based upon the information available at a point in time and are subject to unforeseen and random events. Therefore, any projection must be interpreted as having a likely range of variability from the estimate. Any estimate or projection may not be used or relied upon by any other party or for any other purpose than for which it was issued by Mercer. Mercer is not responsible for the consequences of any unauthorized use.*

We are available to answer any questions on this material contained in this report, or to provide explanations or further details, as may be appropriate. The undersigned credentialed actuaries meet the qualification standards of the American Academy of Actuaries to perform the analyses contained in this report. We are not aware of any direct or indirect financial interest or relationship, including investments or other services that could create a conflict of interest that would impair the objectivity of our work.

## Data

Mercer relied on several data sources in the development of these projections. Mercer reviewed the data for reasonability and consistency, but we did not audit it. Data elements include the following listed in the table below:

Data	Source	Use
Population projections (November 1, 2012 edition)	CT State Data Center at the Map and Geographic Information Center	Town-level State of CT population projections by age group and gender. Starting from the 2010 census, projections are shown for 2015, 2020 and 2025.
Labor Market Areas	CT Department of Labor	Aggregation of towns for projections.
NF Cost Reports	DSS	Information from the nursing homes on utilization and staffing.
Nursing Home 15-Mile Town Radius	DSS	For each town, in addition to the nursing homes located in that town, those nursing homes within a 15-mile radius of the town are also listed, up to a maximum of 10 such nursing homes. The nursing homes are ranked by the number of available beds.
State of CT Claims and Eligibility Data	HP, CT's Medicaid data vendor	Classification of Medicaid recipients in the Aged, Blind and Disabled aid category, NF Level of Care, waiver eligibility and claims.
ZIP Code to Town Crosswalk	CT Economic Resource Center	Translate eligibility and claimant information, which did not have town of the recipient (but did have ZIP code) to town.
JEN Frailty Index	JEN & Associates	Reporting on the frailty level of nursing home residents.

Mercer's analysis of the targeted case management (TCM) claim data found that levels of recipients with TCM-only services was similar for January 2009 through April 2010 and the beginning in January 2012, but was approximately 20% of that level in late 2010 and all of 2011. We made data adjustments to treat the number of TCM only recipients as if no such temporary drop existed.

The ZIP code to town crosswalk could not distinguish all 169 towns from one another. Accordingly, the following towns are paired in our analysis: Cornwall and Warren, Griswold and Lisbon, Stafford and Union.

## 3

## Nursing Facility and Home - and Community-Based Services Definitions

Another common point of necessary clarification when examining statistics nationally or between states is how NF and HCBS are defined. Typically, NF and HCBS together make up what is known as Nursing Facility Level of Care (NFLOC). This designation for a Medicaid recipient means that the person in question has, according to the specific State assessments, met the conditions necessary to receive NF services. NF and HCBS together combine to NFLOC because people can choose to receive LTC services either in an institution or HCBS setting.

Setting of Care – either NF or HCBS – is defined in the analysis for each recipient on a month-by-month basis according to the following definitions:

Setting of Care	Definition																						
NF	If the Assignment Plan Code in the State's eligibility file is populated with 'NHOME' and the enrollee used some form of NF or waiver services during the month, then the person was counted as being NF for that particular month.																						
HCBS	<p>If the recipient's Assignment Plan Code in the State's eligibility file was populated as one of the codes listed below and the recipient used some form of either NF or waiver services during the month, then the recipient was counted as HCBS for that particular month.</p> <table><tr><td>ABIA</td><td>Acquired Brain Injury Assignment Waiver</td></tr><tr><td>ALA</td><td>Assisted Living Assignment Waiver</td></tr><tr><td>ASSA</td><td>Assessment Only Assignment Waiver</td></tr><tr><td>CBCMA</td><td>Community Based/Case Managed Assignment Waiver</td></tr><tr><td>PCAA</td><td>Personal Care Assistant Assignment Waiver</td></tr><tr><td>DDS</td><td>Department of Development Services Comprehensive Waiver</td></tr><tr><td>IFS</td><td>Individual and Family Support Waiver</td></tr><tr><td>MFP</td><td>Money Follows Person</td></tr><tr><td>MFPP</td><td>Money Follows Person – Post</td></tr><tr><td>EDS</td><td>DDS Employment and Day Support Waiver</td></tr><tr><td>HOSPS</td><td>Hospice – State</td></tr></table>	ABIA	Acquired Brain Injury Assignment Waiver	ALA	Assisted Living Assignment Waiver	ASSA	Assessment Only Assignment Waiver	CBCMA	Community Based/Case Managed Assignment Waiver	PCAA	Personal Care Assistant Assignment Waiver	DDS	Department of Development Services Comprehensive Waiver	IFS	Individual and Family Support Waiver	MFP	Money Follows Person	MFPP	Money Follows Person – Post	EDS	DDS Employment and Day Support Waiver	HOSPS	Hospice – State
ABIA	Acquired Brain Injury Assignment Waiver																						
ALA	Assisted Living Assignment Waiver																						
ASSA	Assessment Only Assignment Waiver																						
CBCMA	Community Based/Case Managed Assignment Waiver																						
PCAA	Personal Care Assistant Assignment Waiver																						
DDS	Department of Development Services Comprehensive Waiver																						
IFS	Individual and Family Support Waiver																						
MFP	Money Follows Person																						
MFPP	Money Follows Person – Post																						
EDS	DDS Employment and Day Support Waiver																						
HOSPS	Hospice – State																						

Setting of Care	Definition
HCBS	Traditionally, the State has included TCM recipients with their HCBS participant counts, even though TCM is a State Plan service, not a waiver service. In order to preserve the State's traditional definition, we have also included unique monthly participant counts of stand-alone TCM users with the unique counts of persons identified as using HCBS in the aforementioned definition.
HCBS	For purposes of calculating home health worker counts, only utilization for people incurring home health claims for four consecutive months in any calendar year were included, regardless of their level of utilization.

## 4

## Labor Market Areas

There are 169 towns in Connecticut, many with relatively small populations and no nursing homes. Accordingly, the analysis of nursing homes by town needs to be augmented by analysis on aggregations of towns. Based on discussions with the Connecticut Department of Labor, Mercer decided to include analyses of each of the nine Connecticut Labor Market Areas. The towns that comprise the Connecticut Labor Market Areas are shown in the table in this section.

The Connecticut Labor Market Areas are based on towns that share a high degree of social and economic integration, as based on employment and related commuting. The Labor Market Area shares many characteristics with the New England City and Town Area (NECTA), which is a geographic and statistical entity defined by the United States Office of Management and Budget. The NECTA is used only for the states in the New England area of the US; areas based on aggregations of counties are used in the other states. Each NECTA has a core urban area with at least 10,000 persons, as well as adjacent towns that have a high degree of social and economic integration with the core urban area as measured by commuting and employment. NECTAs are classified as either metropolitan NECTAs (urban core of at least 50,000 persons) or micropolitan NECTAs (urban core of at least 10,000 but less than 50,000 persons). Individual NECTAs may be comprised of towns from more than one state, but the Connecticut Labor Market Areas consist only of towns in Connecticut.

## Connecticut Population Projections

Population projections were developed by the Connecticut State Data Center at the Map and Geographic Information Center. These are town-level projections by age group and gender. Data from the 2010 census is the starting point, with projections for 2015, 2020 and 2025.

Below are additional details regarding the development of the population projections, including methodology. This information is available at: <http://ctsdc.uconn.edu/projections.html> (downloadable data and methodology is included below the interactive map/data visualization).

1. The Projections are based on five-year age/sex cohorts by state, county, regional planning organization and town. The 2010 Census data is based on April 1, 2010 data and the projections include a mix of data from the 2010 Census (April 1, 2010) and annual-based data (birth and mortality data from the Connecticut Department of Public Health by Town). With the census data being the base dataset, the projections are optimized for April 1 projections for 2015, 2020 and 2025
2. The finalized projections include individual town level fertility rates for Connecticut's eight largest towns (Bridgeport, Danbury, Hartford, New Britain, New Haven, Norwalk, Stamford and Waterbury) and the remaining towns are grouped into two categories (American Community Survey (ACS) three-year towns and ACS five-year towns) to calculate the fertility rate for these towns. The reason for calculating the fertility rate in this method is that the underlying population projections are developed at the single age level and then grouped into cohorts.

Each town has individually derived migration (in and out) based on town-level Census data from 2010, as well as birth and mortality data by single year increments. More details are included in the methodology:

[http://magic.lib.uconn.edu/magic\\_2/data/37800/projectionct\\_37800\\_0000\\_2012\\_s24\\_CTSDC\\_1\\_p.pdf](http://magic.lib.uconn.edu/magic_2/data/37800/projectionct_37800_0000_2012_s24_CTSDC_1_p.pdf)

3. The birth and mortality data is based on calendar year data from the CT Department of Public Health and is provided at the town level.
4. Group quarters are removed from the projections and then, upon the completion of the projection, this data is added back in to reduce over/under estimation of this population. Refer to the link above for a complete listing of the group quarters (at the end of the document).

The above description was written by Michael Howser of the Connecticut State Data Center.

## JEN Frailty Index

The frailty risk score was developed under funding by the Robert Wood Johnson Foundation's Medicare/Medicaid Integration Project (University of Maryland Center on Aging, MMIP Technical Assistance Paper No. 12, 2002). The score is based on 13 impairment categories of disease/sign found to be significantly related with a concurrent and future need for long-term care services. The categories include:

- Minor ambulatory limitations
- Severe ambulatory limitations
- Cognitive developmental disability
- Chronic mental illness
- Dementia
- Sensory disorders
- Self-care impairment
- Syncope
- Cancer
- Chronic medical disease
- Pneumonia
- Renal disorders
- Other systemic disorders (e.g., septicemia).

For each category, a score of one is assigned if a diagnosis associated with the condition is found on at least one Medicare or Medicaid claim during a specific calendar year of study. No frequency threshold, claim type, provider type or service type selection logic is used. The frailty individual impairment category scores are summed to produce an aggregate frailty risk score. The frailty risk score has been demonstrated to have a linear relationship with the probability of future nursing home entry.

The above description was written by JEN & Associates.

---

## Analysis

The overarching process for developing this projection is as follows:

1. Project the population of the State by age and gender.
2. Project the proportion of the State population that is Medicaid eligible Aged, Blind and Disabled (ABD).
3. Project the proportion of the ABD population that is NFLOC
4. Project the proportion of the NFLOC population using HCBS services.

This process was conducted at the Labor Market Area Level and projected on the individual towns in the labor markets, then aggregated at the statewide level.

As stated before, we were able to utilize population projections developed by the Connecticut State Data Center by age, gender and by town, through 2025. These projections include town-by-town, in-migration and out-migration. Mercer assumed, by town, a constant ABD and NFLOC incidence rate by age and gender. As the projection goes toward 2025, the natural aging of the population leads to a higher proportion of the town population expected to be NFLOC.

Historically the NF/HCBS mix in the State has been moving toward HCBS at approximately 0.50% to 0.75% per year, absent the impact of State-led initiatives. This shift, combined with the aging of the population and higher NFLOC incidence rates which acts against NF/HCBS mix, leads the State to a projected NF/HCBS mix of 57.6% in 2025, absent the impact of State-led initiatives.

In our examination of the historical data, Mercer found that beginning in early 2011, there was a significant acceleration in the NF/HCBS mix as a result of the following State led initiatives:

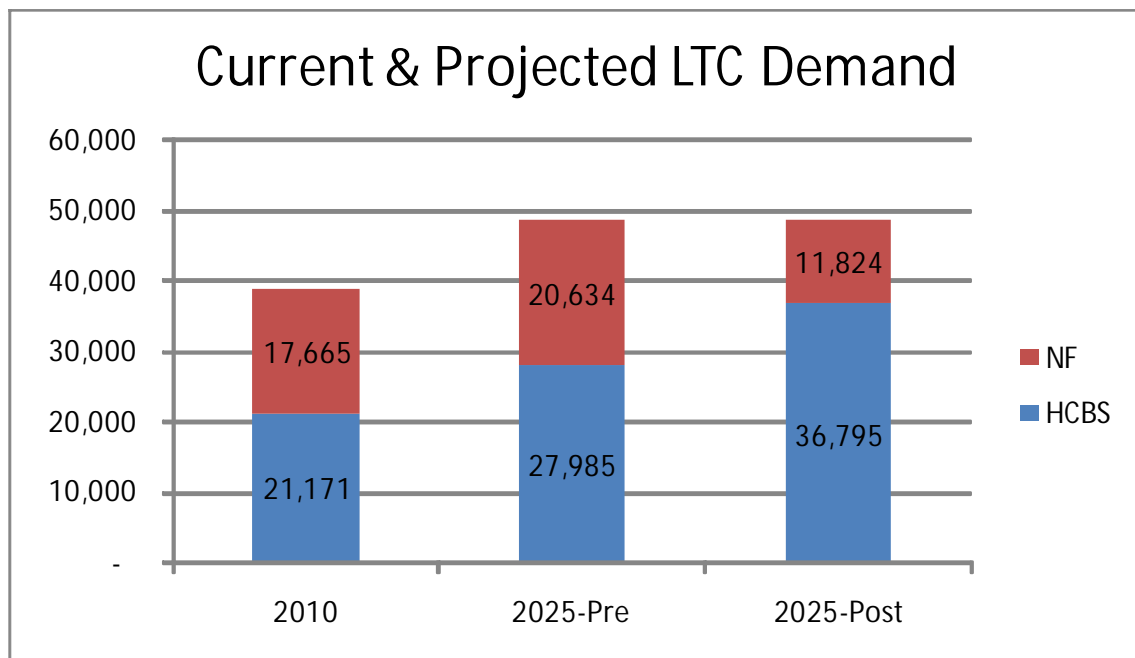

- Money Follows the Person (MFP) Grant
- Hospital Discharge Planning
- NF Closure Model
- Long-Term NF Diversion
- Pre-Admission Screening Resident Review

By incorporating the impact of these initiatives into modeling the projected NF/HCBS mix at the statewide level, it is expected to increase proportionately to 75.7% by the year 2025. The final HCBS/NF mix is consistent with HCBS levels currently being achieved in other states. The proportionate increases were developed at the age, gender and cohort level. Note: these

projections of future HCBS/NF levels presume the State will continue to use current initiatives and will utilize additional initiatives in future years in order to achieve the projected 2025 HCBS levels. We understand the State has made a significant expansion of the MFP workforce in recent months, but the effect of this workforce expansion has not been specifically modeled as a distinct initiative. The dedication of additional resources committed to rebalancing, such as the MFP workforce expansion, has the potential to accelerate movement from nursing facilities to HCBS settings.

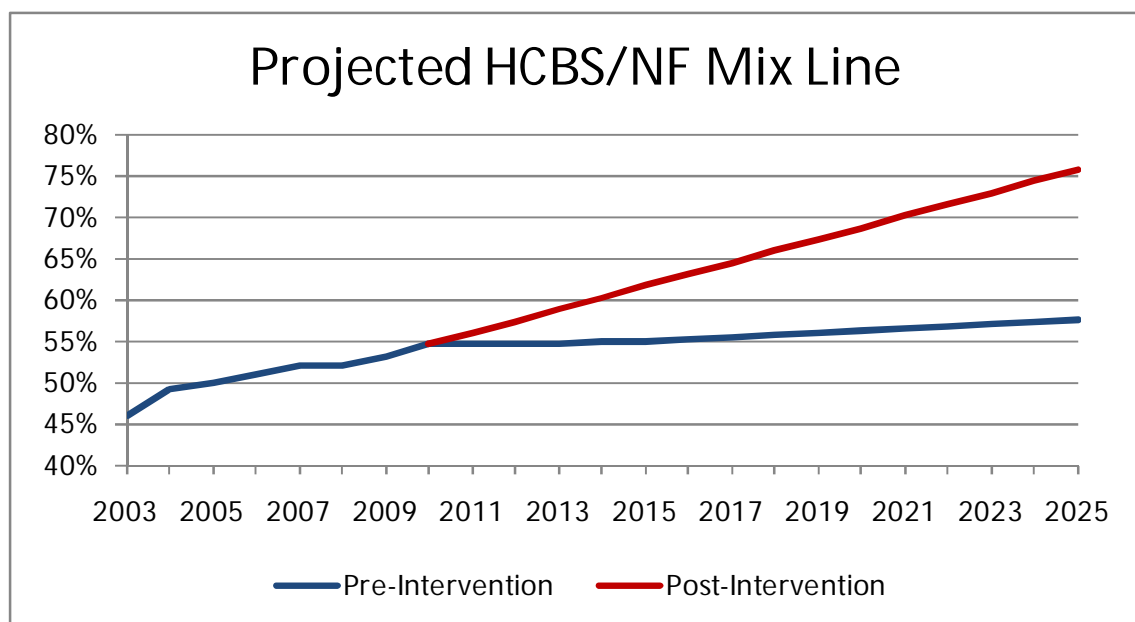

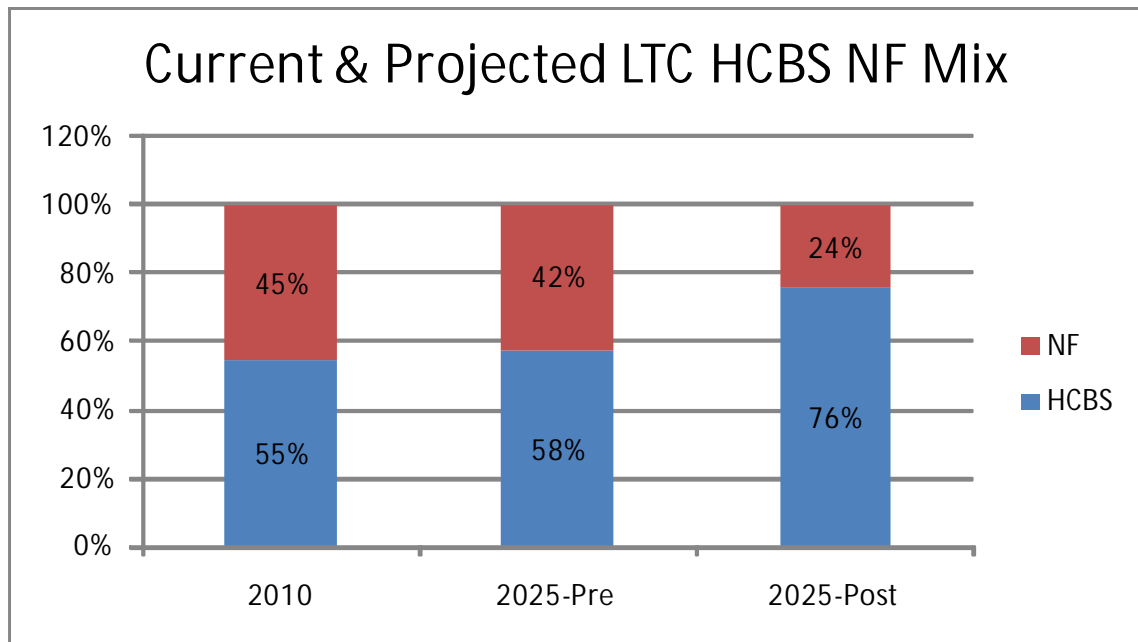

Some labor markets, as illustrated in the labor market templates, were either far behind or far ahead of the statewide average and those markets either grew faster or slower than the statewide average depending on how much movement was possible, considering their starting points.

Another element of the modeling includes projecting the demand for NF and HCBS workers as this shift in NF/HCBS mix occurs. The worker supply and demand reported assume a constant proportion by town of NF/HCBS highlighted work groups throughout the projection. As the population ages and the number of users shifts from NF to HCBS, the worker supply and demand shifts accordingly by town based on the number of people expected to need care under the specific settings.

The accompanying charts highlight the number of LTC users and the corresponding NF/HCBS mix pre and post State-led initiatives. One item to note: the prior projection developed for the LTC Strategic Report included a very accelerated rate of disability through 2025 based on rapid

growth from 2008–2011. That assumption has been revised and we currently have the expectation that the number of CT persons classified as disabled will follow a growth pattern more consistent to historical growth patterns. The impact of this assumption lowers the projected number of NFLOC in 2025 from approximately 63,000 people to approximately 48,000 people.

---

## Town Template Examples

In this section we will walk through two town examples to illustrate the type of qualitative analysis that could be done using this report. The first town, Southington, will also include more technical information to assist the reader with how some of the numbers were derived.

This section of the report goes through the results of the Town of Southington, pointing out particular items. The user may find it useful have the pages with the Boxes (A, B, C, etc.) at hand when reading this section of the report.

Example 1 – Town of Southington (included as part of the Appendix and following this example for review):

*Box A:* This section shows 2011 Cost Report data for Southington. There are three NFs, with a total of 400 beds. Occupancy rates were high across all facilities, totaling 393 residents. Private pay, which includes persons with individual LTC insurance, is a higher portion of days in Southington (26.5%) compared to the statewide average of 12.4%. For example, Alzheimer's Resources Center of CT had 39.4% of resident-days utilized by persons covered by private pay. The total resident-days utilized by Medicaid recipients were 60.2% for the town of Southington, which is lower than the statewide average of 70.1%.

*Box B:* This section continues with 2011 Cost Report data on nursing home staffing levels. For the three Southington nursing homes, the total licensed staff (the combination of Registered Nurses and Licensed Practical Nurses/Licensed Vocational Nurses) amounts to 1.48 hours per resident per day. Food service workers were 0.66 hours per resident per day. These are quite similar to the statewide average of 1.49 and 0.70 hours, respectively. For the Summit at Plantsville nursing home, there are 86.4 food service hours per day (149 residents multiplied by 0.58 total food service worker hours per resident per day). For an eight-hour worker-day, this is 10.77 workers per day. (Actual calculations use more digits of precision than are displayed on the printouts.).

*Box C:* This section contains, for each nursing home, the JEN Frailty Index values provided by JEN & Associates.

*Box D:* This section lists nearby towns with nursing homes. The nearby towns are within 15 miles of Southington. The counts of nursing home and available beds are shown.

*Box E:* This contains the 2010 census and projections for 2015, 2020 and 2025.

*Box F:* This contains growth rates between the five-year projections.

The projected growth rates of total population of Southington are:

- 2.8% for the five-year period from 2010 to 2015
- 1.9% for 2015 to 2020
- 1.5% for 2020 to 2025

Despite slow growth rate in total population of the town, the population aged 75 or older; the age group that is most likely to need long-term care services, is expected to grow at a significantly larger rate.

For example, for those 75–79 years of age, the projected growth rates are:

- 9.45% for the five-year period from 2010 to 2015
- 38.3% for 2015 to 2020
- 20.2% for 2020 to 2025

The rates of growth are quite different among the five-year age blocks. For example, those who are ages 80–84 in 2010 were born around 1926–1930. Those who are ages 80–84 in 2015 were born around 1931–1935, which were in the Great Depression. The plunge in birth rates associated with the Great Depression is a primary reason why the projected growth in 80–84 year-olds is only 1.2% over the five-year period from 2010 to 2015. The different colors in the table help the reader follow a particular five-year age bracket of people across the years. For example, those who are 80–84 in 2015 will be 85–89 in 2020 and there are projected to be just 1.0% more of them than those who were 85–89 in 2015.

*Box G:* This is the number of ABD Medicaid recipients by age and gender.

The number of Medicaid recipients in the ABD category in a given town is driven not only by age and disability status, but also by income and assets.

For October 2009 through September 2010 (the 12-month period centered at the April 1, 2010 census date), the average number of ABD in Southington, as portion of total population is 2.3%, is considerably lower than the statewide average of 3.6%. Although Southington has a smaller percentage of ABD population as compared to statewide, there are numerous similarities to the statewide pattern. Female ABD recipients outnumber their male counterpart for the age bands over 65. As people are aging, this gender difference is widening. Aging plays a significant role as well in the portion of the population that is ABD. For those aged 65–69, only 1.7% of men and 2.4% of women are ABD. The percentages generally increase with age. For those aged 90 and over, one out of five men and one out of three women are Medicaid ABD. As described earlier, Mercer's projections assumed, by town, a constant ABD incidence rate by age and gender. Because of the aging population and difference in mortality rates among men and women, especially for older people, the projected ABD population as a portion of the total population increases steadily, going from 2.3% in 2010 to 2.7% in 2025.

*Box H:* This includes the number NFLOC and *Box I*, the NFLOC as a portion of ABD.

In similar fashion, the average number of recipients at NFLOC is shown and the NFLOC as a portion of ABD was calculated for the same October 2009 through September 2010 time period.

Just less than half (49.4%) of the ABD is NFLOC in total. Again, aging is dominating the number of NFLOC as portion of ABD. For males 0–64, 25.6% of ABD is NFLOC. The percentages increase sharply after age 75, reaching 97.4% for men and 94.1% for women ages 90 and over. Similar to the ABD projection, the number of NFLOC is projected to grow steadily through year 2025, even as NFLOC incidence rates are assumed constant by age and gender. Both the ABD and NFLOC projections are the same when comparing projections absent state initiatives and projections including State initiatives.

See *Box J:* The count of NF persons, *Box K*, the count of HCBS persons and *Box L*, HCBS as a portion of NFLOC.

In town of Southington, the HCBS/NF mix averaged at 39.3% between October 2009 and September 2010, which is significantly lower than the statewide average of 54.5%. There are 294 persons using NF and 190 persons using HCBS. Absent the state-led initiatives, the projected HCBS as a portion of NFLOC mix is expected to be 39.1% by 2025, with the aging of the population overcoming the slow movement toward HCBS within the age and gender cohorts. By incorporating the impact of state-led initiatives into the modeling, the projected HCBS as a portion of NFLOC mix is expected to increase to 62.5% by year 2025. By year 2025, the number of NF recipients is projected to decrease to 259, while HCBS recipients are projected to increase to 431.

Beginning on the fourth page of the Southington town template, displayed are a number of workforce statistics for 2010 and projected statistics to 2015, 2020 and 2025, with and without the impact of the State's initiatives, referenced below as the projection period.

The first section, noted "Nursing Facility Beds Supply and Demand" (*Box M*), gives an account of the total NF bed supply and demand over the projection period. Notice the total supply remains the same throughout the projection period; this is predicated on the assumption that no new facilities will be built. The assumption that the supply remains the same throughout the projection period holds for each of the individual workforce projections. This document answers the question of what the projected workforce demand would be, considering the potential growth in demand for services, with no growth in supply.

Each of the individual workforce projections first projects total supply, then the calculated Medicaid portion of the supply. The difference between the Medicaid portion and the Medicaid demand is the supply excess (deficiency).

Focusing on the “Nursing Facility Beds Supply and Demand” for the Town of Southington, you can see that in 2025, absent any state initiatives, there is projected to be a deficiency in nursing home bed supply. Of the current beds, 60.2%, or 241, are the Medicaid portion of the supply. The projected 2025 utilization absent any state-led initiatives is 421, resulting in a supply deficiency of 180 beds. However, when examining the impact including the State’s initiatives, the demand is 259, resulting in a supply deficiency of 18 beds. What this is telling us is that in this particular town, the aging of the population is outpacing the projected impact of the State’s initiatives.

The following is an account of how some of the summary statistics are calculated.

NF Beds total supply: Equal to the total number of certified beds on page one of the town template. See *Box A*.

NF licensed staff total supply: Equal to the total number of licensed workers per eight-hour day on page one of the town template. See *Box B*.

NF certified nursing assistant (CNA) staff total supply: Equal to the total number of CNA workers per eight-hour day on page one of the town template. See *Box B*.

NF laundry service staff total supply: Equal to the total number of laundry service total supply per eight hours on page one from the town template. See *Box B*.

The home- and community-based worker categories: Personal care assistant, home health aides, the total annual hours utilized divided by 1500 assumed hours worked per year was used to calculate the number of workers. Regarding Adult day care, a patient to staff ratio of 7:1 was used to calculate the number of workers for that category.

#### Example 2 – Town of Hartford

The town of Hartford has five NFs with 802 total certified beds. The occupancy rates across the facilities average 90.0%, which is slightly lower than the statewide average of 90.9%. Hartford has a much lower proportion of private-pay NF utilization (8.4%) when compared to Southington (26.5%) and also when compared to the statewide average (12.4%). When comparing Hartford to Southington, one key statistic to examine is that in 2010 Hartford has an approximate 47 bed excess, while Southington had a 53 bed deficiency. After the implementation of the State’s initiatives, Southington is expected to have an 18 bed deficiency, while Hartford will have a 366 bed excess. What could be deduced from that information is Hartford has a younger nursing home population, whom may be more likely choose to receive LTC services in the community, which accounts for their projected excess in NF beds. Southington on the other hand, has a much smaller and older NF population, which makes it difficult for the town to keep up with the demand for NF services, even with all the work the State is doing to encourage the use of LTC services in the community.

Box C

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Britain	5	52
Meriden	8	96	Newington	3	48
Wallingford	4	91	Farmington	3	48
West Hartford	5	68	Plainville	1	41
Hartford	5	57	Cromwell	3	34

Box D

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns maybe exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry.

The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

**Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012**

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A
N/A	N/A	N/A	N/A	N/A	N/A

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Colchester	2	22
Hartford	5	57	Marlborough	1	18
East Windsor	2	54	Rockville	1	18
Willimantic	1	37	Rocky Hill	2	15
Glastonbury	2	30	South Windsor	1	15

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.37	1.04	1.41	2.29	0.56	0.15	14.11	22.93	5.63	1.54		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Hamden	4	32
Shelton	4	67	Milford	3	31
New Haven	6	48	Stratford	2	22
Bridgeport	4	46	North Haven	1	22
Westport	2	44	Cheshire	2	20

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stafford Springs	1	35			
Tolland	1	5			
Storrs	1	4			

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Farmington	3	48
Meriden	8	96	Plainville	1	41
Torrington	6	77	Cromwell	3	34
West Hartford	5	68	Bloomfield	5	34
New Britain	5	52	Middletown	4	25

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
					</							

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hamden	4	32
Meriden	8	96	Milford	3	31
Wallingford	4	91	North Haven	1	22
Shelton	4	67	Cheshire	2	20
New Haven	6	48	Trumbull	2	17

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Britain	5	52
Meriden	8	96	Newington	3	48
Wallingford	4	91	Farmington	3	48
West Hartford	5	68	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Westport	2	44
Meriden	8	96	Hamden	4	32
Wallingford	4	91	Milford	3	31
Shelton	4	67	North Haven	1	22
New Haven	6	48	Cheshire	2	20

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Shelton	4	67	Southbury	4	11
Danbury	5	61	Wilton	2	11
Bethel	1	29	Ridgefield	1	2
Trumbull	2	17			
Newtown	1	11			

More nursing homes in the nearby towns may exist with fewer available beds

Total work hours are converted to staffing level by dividing by assumed 1500 work hours per year. In addition, a 7:1 Patient to Staff ratio was assumed for Adult Day Care.

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
West Hartford	5	68	Newington	3	48
Manchester	4	62	Farmington	3	48
Hartford	5	57	Plainville	1	41
East Windsor	2	54	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Colchester	2	22
Hartford	5	57	Marlborough	1	18
East Windsor	2	54	Rockville	1	18
Willimantic	1	37	Rocky Hill	2	15
Glastonbury	2	30	South Windsor	1	15

More nursing homes in the nearby towns may exist with fewer available beds

									</		

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Norwich	1	20
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Windham	2	14
Colchester	2	22	Uncasville	1	12

More nursing homes in the nearby towns may exist with fewer available beds

Branford Hills	0.80	0.71	1.51	2.94	0.77	0.21	34.74	67.58	17.65	4.92	4.22	7.83
Total	0.80	0.71	1.51	2.94	0.77	0.21	34.74	67.58	17.65	4.92		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Wallingford	4	91	Guilford	2	18
New Haven	6	48	West Haven	2	17
Hamden	4	32	East Haven	2	13
Milford	3	31	Prospect	1	11
North Haven	1	22	Branford	1	10

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Bethel	1	29
Shelton	4	67	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	West Haven	2	17
Milford	3	31	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	Derby	1	13
New Milford	2	30	Newtown	1	11

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Britain	5	52
Meriden	8	96	Newington	3	48
Wallingford	4	91	Farmington	3	48
West Hartford	5	68	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	New Milford	2	30
Shelton	4	67	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

Pierce Memorial Baptist Home, Inc.												

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Storrs	1	4
Windham	2	14	Dayville	1	3
Danielson	1	14	Brooklyn	1	2
Plainfield	2	12			
Putnam	2	7			

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Torrington	6	77			
Canaan	1	38			
Winsted	1	16			
Sharon	1	6			
Salisbury	1	3			

More nursing homes in the nearby towns may exist with fewer available beds

									</		

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Storrs	1	4
Windham	2	14	Dayville	1	3
Danielson	1	14	Brooklyn	1	2
Plainfield	2	12			
Putnam	2	7			

More nursing homes in the nearby towns may exist with fewer available beds

Cherry Brook Health Care Center	0.51	0.77	1.29	2.55	0.79	0.19	16.07	31.83	9.82	2.38	3.38	5.53

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hartford	5	57
Windsor	3	105	New Britain	5	52
Meriden	8	96	Farmington	3	48
Torrington	6	77	Plainville	1	41
West Hartford	5	68	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Storrs	1	4
Windham	2	14	Dayville	1	3
Danielson	1	14	Brooklyn	1	2
Plainfield	2	12			
Tolland	1	5			

More nursing homes in the nearby towns may exist with fewer available beds

	</											

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Farmington	3	48
Meriden	8	96	Plainville	1	41
Wallingford	4	91	Cromwell	3	34
New Britain	5	52	Hamden	4	32
Newington	3	48	Middletown	4	25

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Old Saybrook	2	27	Niantic	1	9
Middletown	4	25	Portland	1	6
Colchester	2	22	Moodus	1	6
Guilford	2	18	Madison	2	5
Chester	2	15	Cobalt	1	4

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Old Saybrook	2	27	Niantic	1	9
Middletown	4	25	Moodus	1	6
Guilford	2	18	Madison	2	5
Chester	2	15	Durham	1	0
Branford	1	10	Essex	1	0

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Norwichtown	1	18
Glastonbury	2	30	Chester	2	15
Colchester	2	22	Windham	2	14
Norwich	1	20	Uncasville	1	12
Marlborough	1	18	Portland	1	6

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Torrington	6	77	Canaan	1	38
Fairfield	4	75	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Winsted	1	16
Westport	2	44	Newtown	1	11

More nursing homes in the nearby towns may exist with fewer available beds

Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Marlborough	1	18
Willimantic	1	37	Norwichtown	1	18
Glastonbury	2	30	Windham	2	14
Colchester	2	22	Portland	1	6
Norwich	1	20	Moodus	1	6

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	New Britain	5	52
Wallingford	4	91	Newington	3	48
West Hartford	5	68	Farmington	3	48
Manchester	4	62	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danbury	5	61	Wilton	2	11
New Milford	2	30	Ridgefield	1	2
Bethel	1	29			
Newtown	1	11			
Southbury	4	11			

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stamford	8	163	Trumbull	2	17
Fairfield	4	75	Norwalk	3	13
Bridgeport	4	46	Wilton	2	11
Westport	2	44	Southport	1	10
Greenwich	3	35	New Canaan	1	1

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Old Saybrook	2	27	Niantic	1	9
Middletown	4	25	Moodus	1	6
Guilford	2	18	Madison	2	5
Chester	2	15	Durham	1	0
Branford	1	10	Essex	1	0

More nursing homes in the nearby towns may exist with fewer available beds

Total work hours are converted to staffing level by dividing by assumed 1500 work hours per year. In addition, a 7:1 Patient to Staff ratio was assumed for Adult Day Care.

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.77	0.26	1.04	1.94	0.79	0.03	5.31	9.95	4.05	0.17		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	North Haven	1	22
Wallingford	4	91	Cheshire	2	20
Cromwell	3	34	Guilford	2	18
Hamden	4	32	Rocky Hill	2	15
Middletown	4	25	Chester	2	15

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	East Windsor	2	54
Windsor	3	105	New Britain	5	52
Meriden	8	96	Farmington	3	48
West Hartford	5	68	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

Chestelm Health Care	0.55	0.61	1.16	2.80	0.83	0.21	10.60	25.58	7.55	1.91	5.32	7.48
Total	0.55	0.61	1.16	2.80	0.83	0.21	10.60	25.58	7.55	1.91		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Marlborough	1	18
Old Saybrook	2	27	Groton	2	16
Middletown	4	25	Chester	2	15
New London	3	24	Uncasville	1	12
Colchester	2	22	Niantic	1	9

More nursing homes in the nearby towns may exist with fewer available beds

Cobalt Lodge Health Care & Rehab. Ctr	0.47	0.61	1.09	1.90	0.66	0.00	6.79	11.90	4.12	0.00	5.99	7.07

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Middletown	4	25
Hartford	5	57	Colchester	2	22
Newington	3	48	Marlborough	1	18
Cromwell	3	34	Rocky Hill	2	15
Glastonbury	2	30	Chester	2	15

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
West Hartford	5	68	Newington	3	48
Manchester	4	62	Farmington	3	48
Hartford	5	57	Plainville	1	41
East Windsor	2	54	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

			</									

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Chester	2	15
Colchester	2	22	Uncasville	1	12
Norwich	1	20	Niantic	1	9

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stafford Springs	1	35			
Tolland	1	5			
Storrs	1	4			

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Milford	3	31
Shelton	4	67	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data										
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I. Percent Other
Total										

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Rockville	1	18
Manchester	4	62	South Windsor	1	15
East Windsor	2	54	East Hartford	2	13
Stafford Springs	1	35	Enfield	3	13
Bloomfield	5	34	Vernon	1	6

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Bloomfield	5	34
Manchester	4	62	Simsbury	2	20
Hartford	5	57	Rockville	1	18
East Windsor	2	54	South Windsor	1	15
Stafford Springs	1	35	East Hartford	2	13

More nursing homes in the nearby towns may exist with fewer available beds

									</		

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Uncasville	1	12
Old Saybrook	2	27	Branford	1	10
New London	3	24	Niantic	1	9
Colchester	2	22	Moodus	1	6
Chester	2	15	Madison	2	5

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Bethel	1	29
Shelton	4	67	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	West Haven	2	17
Milford	3	31	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
Meriden	8	96	Newington	3	48
West Hartford	5	68	Farmington	3	48
Manchester	4	62	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

Total										

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Windham	2	14
Colchester	2	22	Uncasville	1	12
Norwich	1	20	Plainfield	2	12

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Torrington	6	77	Canaan	1	38
Fairfield	4	75	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Winsted	1	16
Westport	2	44	Kent	1	14

More nursing homes in the nearby towns may exist with fewer available beds

Meadowbrook of Granby	0.55	0.86	1.41	2.68	1.00	0.20	13.75	26.16	9.70	1.99	4.07	7.50

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Britain	5	52
Windsor	3	105	Farmington	3	48
Meriden	8	96	Plainville	1	41
West Hartford	5	68	Cromwell	3	34
East Windsor	2	54	Bloomfield	5	34

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stamford	8	163	New Canaan	1	1
Westport	2	44			
Greenwich	3	35			
Norwalk	3	13			
Wilton	2	11			

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other
									</		

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
							</					

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Norwich	1	20
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Windham	2	14
Mystic	3	22	Uncasville	1	12

More nursing homes in the nearby towns may exist with fewer available beds

	</											

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Groton	2	16
New London	3	24	Uncasville	1	12
Mystic	3	22	Niantic	1	9
Norwich	1	20			
Norwichtown	1	18			

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.69	0.91	1.60	2.68	0.77	0.04	29.33	49.22	14.17	0.65		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	North Haven	1	22
Wallingford	4	91	Guilford	2	18
New Haven	6	48	West Haven	2	17
Hamden	4	32	Chester	2	15
Middletown	4	25	East Haven	2	13

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data										
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I. Percent Other
Total										

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	North Haven	1	22
Wallingford	4	91	Guilford	2	18
Cromwell	3	34	Chester	2	15
Old Saybrook	2	27	Branford	1	10
Middletown	4	25	Portland	1	6

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hamden	4	32
Meriden	8	96	Milford	3	31
Wallingford	4	91	North Haven	1	22
Shelton	4	67	Cheshire	2	20
New Haven	6	48	Guilford	2	18

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Storrs	1	4
Windham	2	14	Dayville	1	3
Danielson	1	14	Brooklyn	1	2
Plainfield	2	12			
Putnam	2	7			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
West Hartford	5	68	Newington	3	48
Manchester	4	62	Farmington	3	48
Hartford	5	57	Plainville	1	41
East Windsor	2	54	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

						</					

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Colchester	2	22
Hartford	5	57	Marlborough	1	18
East Windsor	2	54	Rockville	1	18
Willimantic	1	37	Rocky Hill	2	15
Glastonbury	2	30	South Windsor	1	15

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.45	0.94	1.39	2.48	0.85	0.23	13.22	23.53	8.03	2.19		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
New Milford	2	30			
Kent	1	14			
Sharon	1	6			
Litchfield	1	3			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danielson	1	14			
Plainfield	2	12			
Putnam	2	7			
Dayville	1	3			
Brooklyn	1	2			

More nursing homes in the nearby towns may exist with fewer available beds

Total work hours are converted to staffing level by dividing by assumed 1500 work hours per year. In addition, a 7:1 Patient to Staff ratio was assumed for Adult Day Care.

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Marlborough	1	18
Willimantic	1	37	Norwichtown	1	18
Glastonbury	2	30	Windham	2	14
Colchester	2	22	Portland	1	6
Norwich	1	20	Moodus	1	6

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other
									</		

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Uncasville	1	12
Mystic	3	22	Niantic	1	9
Norwich	1	20	Essex	1	0

More nursing homes in the nearby towns may exist with fewer available beds

Rose Haven, Ltd.	1.76	0.00	1.76	3.92	1.06	0.35	3.75	8.32	2.25	0.74	7.03	

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Torrington	6	77	Bethel	1	29
Fairfield	4	75	Bristol	4	24
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Forestville	1	18
Westport	2	44	Winsted	1	16

More nursing homes in the nearby towns may exist with fewer available beds

Total work hours are converted to staffing level by dividing by assumed 1500 work hours per year. In addition, a 7:1 Patient to Staff ratio was assumed for Adult Day Care.

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	North Haven	1	22
Wallingford	4	91	Guilford	2	18
New Haven	6	48	West Haven	2	17
Hamden	4	32	Chester	2	15
Middletown	4	25	East Haven	2	13

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Bloomfield	5	34
West Hartford	5	68	Glastonbury	2	30
Manchester	4	62	Marlborough	1	18
Hartford	5	57	Rockville	1	18
East Windsor	2	54	Rocky Hill	2	15

More nursing homes in the nearby towns may exist with fewer available beds

Mansfield Center for Nursing & Rehab	0.86	0.69	1.55	2.98	0.77	0.20	18.81	36.10	9.39	2.45	5.79	7.20

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Newington	3	48	Rocky Hill	2	15
Willimantic	1	37	Windham	2	14
Stafford Springs	1	35	Vernon	1	6
Marlborough	1	18	Tolland	1	5
Rockville	1	18	Storrs	1	4

More nursing homes in the nearby towns may exist with fewer available beds

	0.74	0.60	1.34	2.61	0.63	0.04	17.76	34.63	8.37	0.48	4.77	7.86
Total	0.74	0.60	1.34	2.61	0.63	0.04	17.76	34.63	8.37	0.48		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Middletown	4	25
Hartford	5	57	Colchester	2	22
Newington	3	48	Marlborough	1	18
Cromwell	3	34	Rocky Hill	2	15
Glastonbury	2	30	Chester	2	15

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Farmington	3	48
Meriden	8	96	Plainville	1	41
Wallingford	4	91	Cromwell	3	34
New Britain	5	52	Hamden	4	32
Newington	3	48	Middletown	4	25

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Derby	1	13
Hamden	4	32	Wolcott	1	12
Bristol	4	24	Prospect	1	11
Cheshire	2	20	Newtown	1	11
Forestville	1	18	Southbury	4	11

More nursing homes in the nearby towns may exist with fewer available beds

Total												

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	Cromwell	3	34
Wallingford	4	91	Hamden	4	32
New Britain	5	52	Glastonbury	2	30
Newington	3	48	Middletown	4	25
Plainville	1	41	North Haven	1	22

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	Cromwell	3	34
Wallingford	4	91	Glastonbury	2	30
New Britain	5	52	Middletown	4	25
Newington	3	48	Cheshire	2	20
Plainville	1	41	Marlborough	1	18

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Milford	3	31
Shelton	4	67	Bethel	1	29
New Haven	6	48	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Hamden	4	32	West Haven	2	17

More nursing homes in the nearby towns may exist with fewer available beds

Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
Total												

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Milford	3	31
Shelton	4	67	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

	0.47	0.74	1.21	2.44	0.65	0.19	17.95	36.28	9.73	2.76	5.34	7.10
Total	0.47	0.74	1.21	2.44	0.65	0.19	17.95	36.28	9.73	2.76		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Norwich	1	20
Old Saybrook	2	27	Norwichtown	1	18
New London	3	24	Groton	2	16
Colchester	2	22	Uncasville	1	12
Mystic	3	22	Niantic	1	9

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
					</							

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Milford	2	30
Torrington	6	77	Bethel	1	29
Fairfield	4	75	Bristol	4	24
Bridgeport	4	46	Stratford	2	22
Westport	2	44	Forestville	1	18

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hamden	4	32
Meriden	8	96	Bristol	4	24
Wallingford	4	91	North Haven	1	22
Shelton	4	67	Cheshire	2	20
New Haven	6	48	Forestville	1	18

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
Meriden	8	96	Newington	3	48
West Hartford	5	68	Farmington	3	48
Manchester	4	62	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stamford	8	163	Trumbull	2	17
Fairfield	4	75	Norwalk	3	13
Bridgeport	4	46	Wilton	2	11
Westport	2	44	Southport	1	10
Greenwich	3	35	Ridgefield	1	2

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danbury	5	61	Ridgefield	1	2
New Milford	2	30			
Bethel	1	29			
Newtown	1	11			
Southbury	4	11			

More nursing homes in the nearby towns may exist with fewer available beds

Total work hours are converted to staffing level by dividing by assumed 1500 work hours per year. In addition, a 7:1 Patient to Staff ratio was assumed for Adult Day Care.

[illegible]

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Total	0.53	1.04	1.58	2.95	0.79	0.15	106.19	198.66	53.40	10.08		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Wallingford	4	91	Stratford	2	22
Shelton	4	67	North Haven	1	22
New Haven	6	48	Cheshire	2	20
Hamden	4	32	Guilford	2	18
Milford	3	31	West Haven	2	17

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Groton	2	16
New London	3	24	Uncasville	1	12
Mystic	3	22	Niantic	1	9
Norwich	1	20			
Norwichtown	1	18			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
New Milford	2	30			
Kent	1	14			
Southbury	4	11			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
Meriden	8	96	Newington	3	48
West Hartford	5	68	Farmington	3	48
Manchester	4	62	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

Masonicare at Newtown	0.75	0.97	1.72	3.33	0.60	0.06	31.12	60.32	10.95	1.06	4.16	8.02

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	New Milford	2	30
Shelton	4	67	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
												</

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Torrington	6	77	Canaan	1	38
Fairfield	4	75	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Winsted	1	16
Westport	2	44	Newtown	1	11

More nursing homes in the nearby towns may exist with fewer available beds

	</										

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	North Haven	1	22
Wallingford	4	91	Cheshire	2	20
New Haven	6	48	Guilford	2	18
Hamden	4	32	West Haven	2	17
Middletown	4	25	East Haven	2	13

More nursing homes in the nearby towns may exist with fewer available beds

Geer Nursing and Rehab. Center												

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Canaan	1	38			
Winsted	1	16			
Sharon	1	6			
Salisbury	1	3			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	Cheshire	2	20
Wallingford	4	91	Guilford	2	18
New Haven	6	48	West Haven	2	17
Hamden	4	32	Derby	1	13
North Haven	1	22	East Haven	2	13

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other
									</		

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Uncasville	1	12
Mystic	3	22	Plainfield	2	12
Norwich	1	20	Essex	1	0

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stamford	8	163	Trumbull	2	17
Fairfield	4	75	Norwalk	3	13
Bridgeport	4	46	Wilton	2	11
Westport	2	44	Southport	1	10
Greenwich	3	35	Ridgefield	1	2

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Norwichtown	1	18
Waterford	3	29	Groton	2	16
New London	3	24	Windham	2	14
Colchester	2	22	Uncasville	1	12
Norwich	1	20	Plainfield	2	12

More nursing homes in the nearby towns may exist with fewer available beds

Total										

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
			</									

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Uncasville	1	12
Old Saybrook	2	27	Branford	1	10
New London	3	24	Niantic	1	9
Colchester	2	22	Moodus	1	6
Chester	2	15	Madison	2	5

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Hamden	4	32
Shelton	4	67	Milford	3	31
New Haven	6	48	Stratford	2	22
Bridgeport	4	46	North Haven	1	22
Westport	2	44	Trumbull	2	17

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	North Haven	1	22
Shelton	4	67	Cheshire	2	20
New Haven	6	48	Trumbull	2	17
Hamden	4	32	West Haven	2	17
Bethel	1	29	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Plainfield	2	12
Norwich	1	20	Dayville	1	3
Norwichtown	1	18	Brooklyn	1	2
Windham	2	14			
Danielson	1	14			

More nursing homes in the nearby towns may exist with fewer available beds

							</					

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Newington	3	48
Meriden	8	96	Farmington	3	48
West Hartford	5	68	Plainville	1	41
Hartford	5	57	Cromwell	3	34
New Britain	5	52	Bloomfield	5	34

More nursing homes in the nearby towns may exist with fewer available beds

										</		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Farmington	3	48
Meriden	8	96	Plainville	1	41
Wallingford	4	91	Bristol	4	24
Torrington	6	77	Avon	2	21
New Britain	5	52	Cheshire	2	20

More nursing homes in the nearby towns may exist with fewer available beds

Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
					</							

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danielson	1	14			
Putnam	2	7			
Dayville	1	3			
Brooklyn	1	2			

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.88	0.65	1.53	3.21	0.91	0.34	10.12	21.29	6.01	2.27		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Meriden	8	96	Newington	3	48
West Hartford	5	68	Cromwell	3	34
Manchester	4	62	Glastonbury	2	30
Hartford	5	57	Middletown	4	25
New Britain	5	52	Colchester	2	22

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Norwich	1	20
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Windham	2	14
Mystic	3	22	Uncasville	1	12

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.68	0.88	1.56	2.53	0.65	0.07	22.63	36.68	9.45	0.98		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hamden	4	32
Meriden	8	96	Bristol	4	24
Wallingford	4	91	North Haven	1	22
New Haven	6	48	Cheshire	2	20
Plainville	1	41	Forestville	1	18

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danielson	1	14			
Plainfield	2	12			
Putnam	2	7			
Dayville	1	3			
Brooklyn	1	2			

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Bethel	1	29
Shelton	4	67	Trumbull	2	17
Danbury	5	61	Norwalk	3	13
Bridgeport	4	46	Newtown	1	11
Westport	2	44	Southbury	4	11

More nursing homes in the nearby towns may exist with fewer available beds

Laurel Ridge Health Care Center												

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danbury	5	61	Newtown	1	11
Westport	2	44	Wilton	2	11
Bethel	1	29	Ridgefield	1	2
Trumbull	2	17	New Canaan	1	1
Norwalk	3	13			

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.46	0.89	1.34	2.60	0.67	0.11	34.12	66.09	16.93	2.76		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
Meriden	8	96	Newington	3	48
West Hartford	5	68	Farmington	3	48
Manchester	4	62	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I. Percent Other
Total										

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Milford	2	30
Fairfield	4	75	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Kent	1	14
Westport	2	44	Newtown	1	11

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Chester	2	15
Colchester	2	22	Uncasville	1	12
Norwich	1	20	Niantic	1	9

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Canaan	1	38			
Sharon	1	6			
Salisbury	1	3			

More nursing homes in the nearby towns may exist with fewer available beds

												</

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hamden	4	32
Shelton	4	67	Milford	3	31
New Haven	6	48	Stratford	2	22
Bridgeport	4	46	North Haven	1	22
Westport	2	44	Cheshire	2	20

More nursing homes in the nearby towns may exist with fewer available beds

Total	1.06	0.78	1.84	3.04	0.90	0.22	17.21	28.52	8.48	2.03		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Canaan	1	38			
Kent	1	14			
Sharon	1	6			
Salisbury	1	3			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Milford	3	31
Shelton	4	67	Bethel	1	29
New Haven	6	48	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Hamden	4	32	West Haven	2	17

More nursing homes in the nearby towns may exist with fewer available beds

Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
							</					

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danbury	5	61			
New Milford	2	30			
Kent	1	14			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Newington	3	48
Torrington	6	77	Farmington	3	48
West Hartford	5	68	Plainville	1	41
Hartford	5	57	Bloomfield	5	34
New Britain	5	52	Bristol	4	24

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Rockville	1	18
Manchester	4	62	South Windsor	1	15
East Windsor	2	54	East Hartford	2	13
Stafford Springs	1	35	Enfield	3	13
Bloomfield	5	34	Vernon	1	6

More nursing homes in the nearby towns may exist with fewer available beds

Paradigm Healthcare Center of South Windsor, LLC												

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Newington	3	48
West Hartford	5	68	Bloomfield	5	34
Manchester	4	62	Glastonbury	2	30
Hartford	5	57	Simsbury	2	20
East Windsor	2	54	Rockville	1	18

More nursing homes in the nearby towns may exist with fewer available beds

Lutheran Home of Southbury, Inc.	0.55	0.75	1.30	2.76	0.00	0.17	18.97	40.34	0.00	2.46	2.19	3.93
River Glen Health Care Center	0.58	0.90	1.49	2.22	0.65	0.20	21.57	32.17	9.49	2.88	4.14	7.35

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Derby	1	13
Shelton	4	67	Prospect	1	11
Danbury	5	61	Newtown	1	11
New Milford	2	30	Southbury	4	11
Bethel	1	29	Naugatuck	2	10

More nursing homes in the nearby towns may exist with fewer available beds

Total	0.62	0.86	1.48	3.31	0.66	0.17	72.67	162.59	32.47	8.34		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Britain	5	52
Meriden	8	96	Newington	3	48
Wallingford	4	91	Farmington	3	48
West Hartford	5	68	Plainville	1	41
Hartford	5	57	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
								</				

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Norwichtown	1	18
Old Saybrook	2	27	Windham	2	14
New London	3	24	Uncasville	1	12
Colchester	2	22	Plainfield	2	12
Norwich	1	20	Storrs	1	4

More nursing homes in the nearby towns may exist with fewer available beds

							</					

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Bridgeport	4	46
Shelton	4	67	Stafford Springs	1	35
Manchester	4	62	Hamden	4	32
East Windsor	2	54	Milford	3	31
New Haven	6	48	Bethel	1	29

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stamford	8	163	New Canaan	1	1
Westport	2	44			
Greenwich	3	35			
Norwalk	3	13			
Wilton	2	11			

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Newington	3	48	Rocky Hill	2	15
Willimantic	1	37	Windham	2	14
Norwich	1	20	Danielson	1	14
Marlborough	1	18	Plainfield	2	12
Norwichtown	1	18	Dayville	1	3

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Norwichtown	1	18
Old Saybrook	2	27	Groton	2	16
New London	3	24	Uncasville	1	12
Mystic	3	22	Essex	1	0
Norwich	1	20			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	New Britain	5	52
Windsor	3	105	Farmington	3	48
Meriden	8	96	Plainville	1	41
West Hartford	5	68	Cromwell	3	34
East Windsor	2	54	Bloomfield	5	34

More nursing homes in the nearby towns may exist with fewer available beds

			</									

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hamden	4	32
Torrington	6	77	Bristol	4	24
Farmington	3	48	Avon	2	21
New Haven	6	48	Forestville	1	18
Plainville	1	41	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danielson	1	14			
Putnam	2	7			
Dayville	1	3			
Brooklyn	1	2			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Manchester	4	62	Glastonbury	2	30
East Windsor	2	54	Marlborough	1	18
Newington	3	48	Rockville	1	18
Willimantic	1	37	Rocky Hill	2	15
Stafford Springs	1	35	South Windsor	1	15

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

	0.23	1.12	1.35	2.62	0.85	0.00	42.93	83.27	27.05	0.00	5.76	7.57
	0.41	0.96	1.36	2.52	0.67	0.21	22.30	41.29	11.00	3.49	3.77	6.19
Total	0.29	1.06	1.36	2.59	0.79	0.07	65.23	124.56	38.05	3.49		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Bethel	1	29
Shelton	4	67	Stratford	2	22
Bridgeport	4	46	Trumbull	2	17
Westport	2	44	West Haven	2	17
Milford	3	31	Derby	1	13

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Bloomfield	5	34
West Hartford	5	68	Glastonbury	2	30
Manchester	4	62	Marlborough	1	18
Hartford	5	57	Rockville	1	18
East Windsor	2	54	Rocky Hill	2	15

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Plainville	1	41
Meriden	8	96	Cromwell	3	34
Wallingford	4	91	Hamden	4	32
New Britain	5	52	Middletown	4	25
New Haven	6	48	North Haven	1	22

More nursing homes in the nearby towns may exist with fewer available beds

		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Fairfield	4	75	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Kent	1	14
Westport	2	44	Newtown	1	11
New Milford	2	30	Southbury	4	11

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry.

The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Cheshire	2	20
Meriden	8	96	Forestville	1	18
Plainville	1	41	East Haven	2	13
Hamden	4	32	Wolcott	1	12
Bristol	4	24	Prospect	1	11

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterford	3	29	Groton	2	16
New London	3	24	Uncasville	1	12
Mystic	3	22	Niantic	1	9
Norwich	1	20			
Norwichtown	1	18			

More nursing homes in the nearby towns may exist with fewer available beds

	0.56	0.78	1.35	2.63	0.78	0.23	17.19	33.55	9.99	2.95	6.19	8.27
	1.41	0.38	1.80	2.61	1.31	0.00	10.33	15.01	7.54	0.00	5.64	7.92
Total	0.83	0.66	1.49	2.63	0.95	0.16	27.52	48.56	17.53	2.95		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Cheshire	2	20
Meriden	8	96	Forestville	1	18
Plainville	1	41	East Haven	2	13
Hamden	4	32	Wolcott	1	12
Bristol	4	24	Prospect	1	11

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	New Britain	5	52
West Hartford	5	68	Newington	3	48
Manchester	4	62	Farmington	3	48
Hartford	5	57	Plainville	1	41
East Windsor	2	54	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Wallingford	4	91	Stratford	2	22
Shelton	4	67	North Haven	1	22
New Haven	6	48	Cheshire	2	20
Hamden	4	32	Guilford	2	18
Milford	3	31	West Haven	2	17

More nursing homes in the nearby towns may exist with fewer available beds

Total work hours are converted to staffing level by dividing by assumed 1500 work hours per year. In addition, a 7:1 Patient to Staff ratio was assumed for Adult Day Care.

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stamford	8	163	Westport	2	44
Fairfield	4	75	Bethel	1	29
Shelton	4	67	Stratford	2	22
Danbury	5	61	Trumbull	2	17
Bridgeport	4	46	Norwalk	3	13

More nursing homes in the nearby towns may exist with fewer available beds

Westport Health Care Center	0.41	1.02	1.43	2.58	0.78	0.18	16.83	30.34	9.14	2.10	6.21	8.35

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Stamford	8	163	Trumbull	2	17
Fairfield	4	75	Norwalk	3	13
Bridgeport	4	46	Wilton	2	11
Westport	2	44	Southport	1	10
Stratford	2	22	Ridgefield	1	2

More nursing homes in the nearby towns may exist with fewer available beds

Total work hours are converted to staffing level by dividing by assumed 1500 work hours per year. In addition, a 7:1 Patient to Staff ratio was assumed for Adult Day Care.

More nursing homes in the nearby towns may exist with fewer available beds

									</		

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Newington	3	48	Rocky Hill	2	15
Willimantic	1	37	Windham	2	14
Stafford Springs	1	35	Vernon	1	6
Marlborough	1	18	Tolland	1	5
Rockville	1	18	Storrs	1	4

More nursing homes in the nearby towns may exist with fewer available beds

Laurel Hill Healthcare	0.66	0.91	1.57	2.62	0.78	0.22	13.17	21.95	6.52	1.88	4.95	7.35
Total	0.66	0.91	1.57	2.62	0.78	0.22	13.17	21.95	6.52	1.88		

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Torrington	6	77	Canaan	1	38
Fairfield	4	75	Bethel	1	29
Danbury	5	61	Stratford	2	22
Bridgeport	4	46	Winsted	1	16
Westport	2	44	Newtown	1	11

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Willimantic	1	37	Plainfield	2	12
Colchester	2	22	Storrs	1	4
Norwich	1	20	Brooklyn	1	2
Norwichtown	1	18			
Windham	2	14			

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Windsor	3	105	Newington	3	48
West Hartford	5	68	Farmington	3	48
Manchester	4	62	Plainville	1	41
Hartford	5	57	Cromwell	3	34
East Windsor	2	54	Bloomfield	5	34

More nursing homes in the nearby towns may exist with fewer available beds

Bickford Health Care Center	0.79	0.45	1.24	2.65	0.90	0.17	7.13	15.26	5.17	1.00	3.55	5.93

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hartford	5	57
Windsor	3	105	East Windsor	2	54
Meriden	8	96	New Britain	5	52
West Hartford	5	68	Plainville	1	41
Manchester	4	62	Cromwell	3	34

More nursing homes in the nearby towns may exist with fewer available beds

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Farmington	3	48
Meriden	8	96	New Haven	6	48
Wallingford	4	91	Plainville	1	41
New Britain	5	52	Hamden	4	32
Newington	3	48	Bristol	4	24

More nursing homes in the nearby towns may exist with fewer available beds

						</						

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Hamden	4	32
Wallingford	4	91	Milford	3	31
Shelton	4	67	Stratford	2	22
New Haven	6	48	North Haven	1	22
Westport	2	44	Cheshire	2	20

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles
		</										

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Waterbury	8	121	Stratford	2	22
Fairfield	4	75	Wolcott	1	12
Bridgeport	4	46	Prospect	1	11
Westport	2	44	Newtown	1	11
New Milford	2	30	Southbury	4	11

More nursing homes in the nearby towns may exist with fewer available beds

2011 Cost Report Data											
Nursing Homes	Type of Ownership	Certified Beds	Residents	Percent Occupied	Chronic & Convalescent Nursing Homes	Rest Homes with Nursing Supervision	Percent Medicare	Percent Medicaid	Percent Private	Percent State S.S.I.	Percent Other

2011 Cost Report Data											JEN Frailty Index	
Nursing Homes	RN Hours per Resident per Day	LPN/LVN Hours per Resident per Day	Total Licensed Hours per Resident per Day	CNA Hours per Resident per Day	Total Food Service Hours per Resident per Day	Total Laundry Service Hours per Resident per Day	Total Licensed Workers Per 8 Hour Day	Total CNA Workers Per 8 Hour Day	Total Food Service Workers Per 8 Hour Day	Total Laundry Workers Per 8 Hour Day	Average Frailty Index For Medicaid	Average Frailty Index For Dual Eligibles

The JEN Frailty index is a proprietary algorithm that groups individuals into one of 13 categories based on prevalence of diagnoses that have been associated with functional impairment and risk of nursing home entry. The 13 categories have also been grouped into low risk (0-3), medium risk (4-6) and high risk (7-13).

Nearby Towns with nursing Homes ranked by available beds within a 15-mile radius of the given town as of September 2012

Nearby Town	Nursing Home Count	Available Beds	Nearby Town	Nursing Home Count	Available Beds
Danielson	1	14			
Putnam	2	7			
Dayville	1	3			
Brooklyn	1	2			

More nursing homes in the nearby towns may exist with fewer available beds
